

**BRADY****AGE : 10 YEARS****MOUNT PLEASANT, SC****B-CELL ACUTE****LYMPHOBLASTIC LEUKEMIA**

**Meet Brady a fearless 4th grader who was diagnosed with B-Cell Acute Lymphoblastic Leukemia on Valentine's Day, 2019.**

Brady is a tough as nails ten year old 5th grader at Christ Our King Stella-Maris Catholic School. He was diagnosed with B Cell Acute Lymphoblastic Leukemia on Valentine's Day 2019. When he isn't out fishing and shrimping, you can find him on the basketball court or baseball and football fields. He's a LEGO-building, Harry Potter-reading, University of Michigan-cheering fan, who loves shooting hoops in the driveway with friends. While Brady's been through excruciating front-line chemotherapy treatment this past year and won't "ring the bell" until April of 2021, his big heart and constant jokes keep a smile on his nurses and doctors' faces down at MUSC. He's "nuking the Leuk" with the help of his Battle for Brady army who continue to show him so much love and support on his cancer journey.
